

## **JOSEPH C. MCGINLEY** **BS '96, MS '97,** **PHD '04, MD '04**

**JOSEPH C. MCGINLEY** is an inventive educator and mentor, an expert radiologist, and an Owl four times over.

A board-certified diagnostic radiologist, McGinley has had extensive training in musculoskeletal radiology and non-surgical sports medicine. He founded McGinley Orthopedics, a company that designs, develops, markets and sells innovative orthopedic medical devices, and serves as CEO. He's also the president of McGinley Manufacturing, a custom machine and fabrication facility with a fully integrated engineering team.

McGinley is always striving to improve patient care in his clinical practice with innovative approaches—he currently holds more than 75 issued and pending patents—and aims to build companies that focus on patient safety as well as reducing cost.

Committed to being a productive and positive influence on his community, he offers training courses on his own procedures and treatments through his medical education company. He's also a past president of the Wyoming Medical Society and Natrona County Medical Society and serves on the board of Constellation Inc.

McGinley brings his expertise and knowledge back to Temple to guide the College of Engineering and its students. He serves on the college's Board of Visitors and is a student advisor.

He earned his bachelor's and master's degrees, his PhD and his medical degree all from Temple over the course of 12 years. McGinley completed his residency and a fellowship at Stanford University.
